SUMMARY

I'm Widiyanto Eka Saputro, a 25-year-old Full Stack Developer with a degree from Trunojoyo Madura University (2022). I'm passionate about technology and have experience in Web, Back-End Services, and Mobile development. I excel in both individual and team-based work environments.

WORKING EXPERIENCE

Full Stack Developer

(Apr 2024 - Now) at PT. Dwidasa Samsara Indonesia (Surabaya)

As a Full Stack Developer, I develop and maintain web, backend, and mobile applications using Java Spring Boot, Next.js, and Flutter. I focus on enhancing existing products by developing new features, fixing bugs, and ensuring seamless system performance. My key responsibilities include:

- Feature Development & Maintenance - Continuously improving and expanding existing applications
- Bug Fixing & Optimization - Troubleshooting and resolving issues to enhance stability and performance
- Technology Exploration - Researching and implementing new technologies to improve efficiency
- Application Deployment - Deploying applications across various environments, ensuring smooth operations
- System Monitoring & Support - Maintaining and optimizing applications across development, staging, and production environments

I am committed to delivering high-quality solutions while continuously improving applications through innovation and technical expertise

Full Stack Developer

(Aug 2022 - April 2024) at PT. Primavisi Globalindo(Surabaya)

As a Full Stack Developer at a dynamic software house, I developed and maintained web, mobile, and desktop applications using Laravel, Node.js, and Flutter. My role extended beyond coding, encompassing project management, client communication, and deployment. My key responsibilities included:

- Feature Development & Maintenance - Built scalable applications and ensured long-term stability
- Project & Time Management - Managed schedules and delivered projects on time
- Client Communication - Gathered requirements, clarified technical needs, and aligned expectations
- Cross-Team Collaboration - Worked closely with designers, backend engineers, and stakeholders
- Application Deployment - Deployed applications across cPanel, VPS, AWS, and other hosting platforms
- API Integration - Integrated third-party services to enhance application functionality
- SaaS Development - Created Software as a Service (SaaS) systems for various projects
- UI/UX Implementation - Translated business prototypes into interactive UI designs and front-end applications

I thrived in a fast-paced, client-driven environment, balancing technical expertise with communication and problem-solving to deliver high-quality software solutions.

Full Stack Developer - Part Time (Sep 2023 - Nov 2023) at SocioDigitals (Surabaya)

As a part-time freelance Full Stack Developer, I maintained and improved Socio Digitals' applications, which are built using Laravel for the web and Flutter for mobile apps. My key responsibilities included:

- Troubleshoot and debugged application issues to ensure optimal performance and user experience
- Identified and resolved software bugs to ensure a smooth user experience
- Delivered high-quality, clean code for future development and maintenance

Socio Digitals is a marketplace for baby needs, and my role focused on maintaining and optimizing their platform to enhance reliability and efficiency.

Web Developer (May 2016 - Des 2016) at Integrated Model School (Bojonegoro)

As a Web Developer, I created and maintained the official website for Sekolah Menengah Terpadu (SMT) Bojonegoro (.sch.id). My key responsibilities included:

- Developed and managed the school's website to provide information and updates
- Performed regular maintenance to ensure website functionality and security

I utilized PHP, JavaScript, CSS, MySQL, and HTML to build and maintain the platform as a CMS, ensuring a smooth user experience and resolving any technical issues.
